BRAIN DRILL was formed in the summer of 2005 by Dylan Ruskin on guitars as a side project. After parting from his main band Burn at the Stake, he began looking for drummers that could actually play death metal and not just claim they could. Enter Marco Pitruzella. On May 9th vocalist Steve Rathjen entered Castle Ultimate Studios to lay down the vocal tracks. He had only 4 days to learn the songs and lyrics and laid them all down in fewer than 3 hours. Unfortunately Steve left the band shortly after the recording due to stylistic differences. After parting with Steve the band quickly picked up Andre Cornejo the singer from DEAD SYNDICATE, and quickly picked all of the material up. In the winter of 2006 Jeff Hughell was then added to the band as the new and permanent bassist. With mind blowing style and speed inventing a 10 fingered tapping technique using a 7 string bass and the song learning capabilities of a genius it was quite obvious he was a perfect fit into the
